

INFORMATION FOR THE PATIENT

TEN PASS OZONE THERAPY

A New Lease on Life

When Conventional Treatments Fail.

What is ozone therapy?

Ozone Therapy Summary:

Ozone Therapy is a little known medical therapy utilizing oxygen, that has been used worldwide for over 50 years with dramatic success and safety. If you review the ever growing list of Ozone Doctors, you will see that it is being adopted more and more by formally 'traditional' medical practitioners. It is clear that **Ozone Therapy works**, often where conventional treatments fail. It is becoming one of the most useful tools in medical clinics across America and around the World.

What effects does ozone have in the human body?

1. It helps the liver essentially with detoxification
2. It enforces decomposition of fats (cholesterol & triglycerides) These fats are known to be an important damaging factor for the blood vessels, especially in smokers (heart attacks strokes)
3. It considerably improves metabolism of the cells which are the bodies energy producers.
4. It breaks down the levels of uric acid, which is the cause of gout and a damaging factor for the vessels, reducing it considerably.
5. It improves the blood flow, reduces circulation issues and prevents new issues.
6. It reduces the clotting of the red blood cell corpuscles and thus improves the transport of oxygen and the blood flow
7. It increases the amount of oxygen available to the tissue and thus leads to better absorption.

8. It kills many kind of bacteria, viruses, and fungi and prevents their re-appearance.

Field of application for Ozone Therapy (only the most important re listed here)

boosts athletic performance
arthroses of all kinds
arterial calcification of the coronary arteries (heart pain during stress and rest)
prevents sudden heart attack
all liver damage due to alcohol or viruses. Disturbed blood circulation in arms, legs,(ulcers)and in the brain. rehabilitation after apoplexia (including paralysis). rheumatic diseases e.g. muscle or joint rheumatism, lumbago,ischiatric pain.
reduces high blood fats.
high level of uric acid (gout).
delayed physical recovery after serious disease.
epstein barr recovery.
additional therapy for cancer(verified success).
various skin diseases, hives, psoriasis, cancerous lesions ect.
migraine.
many kinds of vertigo.
improves Alzheimer's symptoms.
combats chronic fatigue syndrome.
relieves many symptoms of MS.
prevents cluster headaches.
treats fibromyalgia.
stops shingles outbreaks.
prevents premature aging.
negates and treats many smoking related health issues.
prevents asthma.

fights emphysema.
prevents allergies

One important field of application for ozone – oxygen therapy that has not been mentioned yet.

Precautions against diseases, especially in connection with existing risks, such as nicotine, high cholesterol, high uric acid, high blood pressure, diabetes and old age.

50 years ago, the life expectation was about 50 years. Today, on average, its between 70 and 77 years. With old age there is a considerable increase in general changes of tissue such as calcification of the blood vessels (myocardial infarction, apoplexia , reduced blood circulation to the legs ect.) poor oxygen absorption through the lungs, general failure of the defensive systems of the body and cancer.

Since the reasons for increasingly negative changes are poor oxygen supply and a poor metabolism in the cells, oxygen-ozone therapy, particularly the ten pass ozone method is able to delay the damage (diseases)considerably or to prevent them completely due to its testified biochemical and physiological effects.

Since this therapy has provably improved or healed thousands of diseases of his kind, it is highly recommended to protect oneself as well as possible against diseases and

to achieve a sure healing at an early stage. Disease, especially in its beginning stages should be supported since most patients only turn to ozone therapy in the late stages.

Should your personal disease not be listed in this information brochure, please call Caroline on 97788931 to see if oxygen-ozone therapy would be helpful for your particular condition.

Cost: While most clinics worldwide are charging between 900 – 1000 dollars per session, we are proud to be offering this life changing treatment for just 150 euro per session when booking 10 or more sessions in advance and just 160 for a single session.
