

## OZONATED OILS

**OZONATED OLIVE OIL** – Safe to use on open cuts and wounds.

**OZONATED OLIVE OIL with 20% D.M.S.O** – **NOT** for use on open cuts or wounds.

The benefit of combining D.M.S.O with ozonated olive oil is that the D.M.S.O is a carrier which carries the ozone deep into the tissue where it can aid in the repair of damaged tissue as well as relieve pain.

Ozonated Olive Oil is a truly remarkable substance. At Healthy Healing we have often used it to heal wounds that were not clearing up using any other method. There are many stories of patients who, unable to heal wounds with mainstream antibiotics, completely healed once they discovered ozonated olive oil and used it topically.

When you use ozonated olive oil on a new cut or graze, it heals 50% quicker than if you did not use it. It also stops scarring.

We have found it to be one of the fastest working remedies for clearing up herpes and acne.

The reason for this salves spectacular healing properties is due to fact that ozonated olive oil not only kills bacteria, fungus, and other pathogens and therefore sterilizes the wound, it also does what no antibiotic in the world can do – it stimulates the healing process.

Ozone is an activated form of oxygen that is highly beneficial to the body. Olive oil's molecular structure allows it to hold a higher concentration of ozone than other oils.

This salve has many therapeutic uses and is very suitable for people with sensitive skin.

Our oil is 100% organic and does not contain stabilisers or additives; despite this our oil will keep indefinitely when stored below 25 °C

Ozonated Olive Oil has been used very successfully for over 100 years by Homeopaths and Alternative Health Therapists. The oil holds a variety of health benefits but is most commonly used for conditions of the skin and external body, much as you would use a therapeutic salve or cream.

Used as a massage paste, the ozone acts as an antioxidant, allowing lactic acid and toxins to be released from the pores of the skin.

### Uses for Ozone Olive Oil Include:

- Vaginal Thrush
- Fissures
- Nappy Rash
- Cradle Cap
- Dermatitis
- Skin Yeast
- Eczema
- Insect bites and stings
- Oxidation of lactic acid.
- Hemorrhoids – best natural remedy
- Bedsores
- Cracks
- Cuts
- Sores
- Mouth ulcers
- Non healing ulcers
- Fungal infection of nail
- Athletes foot
- Sunburn
- Crocodile skin

Cleans and sterilizes the skin.

Reduces swelling and inflammation.

Acts as a free radical scavenger on harmful toxins.

Aids in healing processes and reduces scarring.

Reduces incidence of degenerative skin conditions.

Clears infections of the sebaceous glands (sweat glands).

Improves sore muscles (rub as a massage paste).

Quickly remedies cracked dry shins.

Excellent facial moisturizer when used correctly. (Massage into skin and wipe off excess after 20 minutes)

This oil makes a great facial moisturiser at a very reasonable price. However it is important to follow these instructions to avoid any problems:-

Massage a liberal amount of oil into the skin making sure you massage deeply and use enough oil to cover all pores.

Leave the oil on the skin for approximately 20 minutes

**Advice for Thrush sufferers:**

Start by using a very small amount to begin with around the labia majora only. Gradually apply the oil a little deeper in increments over a few days or in a few very severe cases a few weeks. If you do this it will not sting.
