

OXI-CLEAR

Approximately 90% of the body's energy is created by oxygen, along with body processes, brain activity, digestion, elimination, which are reliant on oxygen. No toxins can leave the body unless it is bonded to an oxygen molecule. This directly links to the decrease of atmospheric oxygen. Research has shown that we breathe as little as 19% oxygen to 25% carbon dioxide in large cities, compared to 38% oxygen to 1% carbon dioxide 200 years ago.

The decline in oxygen is attributed to the destruction of the rainforest and global pollution. Poor diet, lack of exercise, the increase of toxins via the food chain, cigarettes, alcohol, and pharmaceutical and recreational drugs are all contributory factors, along with increased stress levels, which can cause shallow breathing. This lack of oxygen is instrumental in contributing to (disease) serious illnesses.

It is said that 80% of all diseases originate in the colon. In an attempt to promote health, it is vital to cleanse the colon, which is the breeding ground for bacteria, viruses, yeast, fungus and parasites, which grow in an anaerobic environment. "Death begins in the colon".

In the last three decades, there have been over 5,000 articles published in medical journals promoting the action of oxygen products on pathogens/microbes. These include: cancer; obesity; Candida; Aids; HIV; arthritis, herpes and Epstein-Barr chronic fatigue syndrome.

The prime cause of cancer according to Dr Otto Warburg won a Nobel Prize in medicine for discovering how body cells use oxygen. "Cancer above all diseases has countless secondary causes". Almost anything can cause cancer but, even for cancer, there is only one primary cause. Summarised in a few words, the prime cause of cancer is the replacement of the respiration of oxygen.

OXY-CLEAR

Oxi-Clear is a preparation formulated to infuse the body with oxygen. It works by activating with stomach acids and then filtering into the bloodstream, causing the breakdown and softening of intestinal plaque and arterial plaque whilst killing pathogens.

Oxi-Clear detoxifies the body through colon cleansing, preventing the re-absorption of toxins back into the bloodstream known as auto-intoxification which causes eliminative organs to work harder.

Oxi-Clear consists of: magnesium peroxide 500mg; ascorbic acid 60mg; citrus bioflavanoids 20mg; silica 10mg and magnesium stearate 10mg. It is used to detoxify the body by cleansing the digestive tract, arteries, blood and internal organs, including the brain

COLON CLEANSING

Cleaning the colon is an essential part of promoting optimum health. It is claimed that between 5-25lbs of impacted faeces can be deposited in the colon. This becomes the breeding ground for harmful bacteria, viruses, fungi, yeast, parasites and worms, along with Candida albicans, which feed off the bad bacteria.

Oxi-Clear balances the body flora by establishing a healthy environment for the good bacteria
